Career Objective

Aspiring AI Engineer with a strong passion for artificial intelligence. Dedicated to continuous learning, constantly acquiring new skills, and developing innovative ideas within the AI domain.

Education

Kakinada Institute of Engineering and Technology (KIET)

Pursuing B.Tech 3rd year – Computer Science and Engineering

CGPA:7.8

Branch: Artificial Intelligence and Data Science , Python Programming.

Internships

Power Bi Intern – Cognifyz Technologies

- Visualize key performance indicators (KPIs) through interactive dashboards
- Identify and analyze trends within the dataset over time or across different categories.

Python Full Stack Intern – EduSkills

- Front-End Development
- Back-End Development with Python
- Version Control
- Problem-Solving & Debugging

Projects

Mobile Price prediction System – Developed a full-stack application for mobile price prediction, utilizing a Logistic Regression machine learning model for accurate price estimation, also used html,css and flask for backend

Flask-Powered Chatbot – Engineered a conversational chatbot application using the Flask web framework for robust back-end development, also added some functionalities of Delete chat ,History of chat and New chat

Skills

Languages: Python, HTML, CSS, JavaScript

Framework: Flask

Concepts: Machine Learning, Web Development

Learning Automation

Certifications

participation in college Hack-A-Thons

Foundation Of Modern Machine Learning

Power Bi

Python Full Stack
